Goldcrest Acquires Herne Hill Site

31.8.11

Goldcrest has acquired another brownfield site in South London having purchased a 0.25 acre site in Herne Hill, Lambeth

Goldcrest Architects will shortly be submitting a planning application for redevelopment of the site to a sympathetically designed mixed use scheme in this important conservation area.

Michael Collins CEO of Goldcrest comments “This acquisition represents a further stage in our current acquisition programme of buying sites without planning consent in appropriate areas, where we have established genuine demand for our product. We remain committed to our acquisition programme and are ready, willing and able to conclude many more deals this year on suitable sites which do not benefit from planning consent.”

Michael Collins continues “In this instance we were able to fully recognise the development potential of a very attractive site which benefits from excellent public transport links and amenities directly opposite the site. We are looking forward to working with the local community and developing the site”
